How to Bisect an Angle and Find a Perpendicular Line

Directions:
1. Draw an angle with your ruler
2. Put the pin of compass on A, and make an arc B-C - Label!
3. Carefully measure B-C
4. Take measurement and put pin on B then make arc.

5. Put pin on C and make the arc. X marks the spot. Label the X with the letter D.
6. Draw a line A-D, it's the middle.

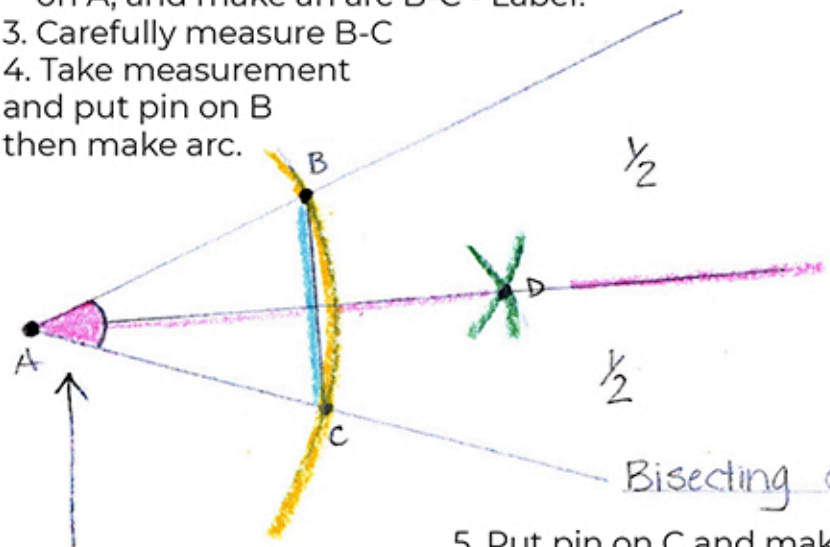

1 2 (BC) Make arc 4

1. Draw a line with ruler and label A-B
2. Measure A-B with your compass
3. Put that measurement on A with the pin on A and make arcs for C and D. Then put the pin on B. X marks the spot.
4. Draw your perpendicular line.
